
presentation skills training

Advanced Presentation Skills Training.

Whether you're new to presenting or whether you're an old hand, many professionals dread the thought of making a presentation. Advanced presentation skills training is an essential for conference presentations, shareholders meetings and sales presentations alike. If you: suffer from public speaking nerves, worry whether you're oozing confidence, or wonder if the audience will act on the thrust of your presentation - you're not alone. However, this negative approach can be easily transformed with our simple techniques and coaching, into the ability to make presentations brilliantly. Not only that, but you'll have a fun time in the process! Our FTSE client base tells us that they've never had an experience quite like it, and most of these guys have got the T-Shirt when it comes to attending advanced communication courses.

It's not what you say but how you say it that really matters. In communication, 7% of the effect is the words that we use, 38% is the tonality of the voice and a massive 55% is attitude and appearance. Over a period of 24 hours the retention of the presentation by the audience stands at a tiny 10%, leaving only 0.7% of the actual wordage being retained. Therefore, what people mainly remember is the impact of you as the speaker.

The key to achieving 'Maximum Impact' presentations isn't by simply superimposing additional presentation skills techniques, once you've conquered the basics its more about removing your distracting body language and non verbal sins and giving you simple techniques to help you remember your speech or presentation to be able deliver it with passion, conviction and integrity.
